

Integrated Pest Management for STUDENTS

WE ALL HAVE A ROLE IN PREVENTING PESTS

Minimize food, water and shelter to discourage pests in your school

Clutter clean-out!

- ❖ Help your teacher keep your classroom clean, organized, and free of clutter

Keep food under wraps!

- ❖ Store lunch and snacks in snap-tight containers
- ❖ Keep food & drink in designated areas
- ❖ Clean up food debris after you eat

Report pests!

- ❖ Let your teacher know if you see insects, mice or feral animals.

Pests hitchhike!

- ❖ So keep coats & backpacks in designated areas of the classroom!

Keep pests out of your stuff!

- ❖ Don't keep food in your locker
- ❖ Clean out your locker once each week

{I have a few graphics to

choose from

for this

central space;

if you have

any you'd like

to send

please

do!}

Trash alert!

- ❖ Take pride in your school; dispose of trash properly and help prevent pests at the same time.

Be aware... but don't touch!

- ❖ Do not disturb the insect monitoring traps located around your school
- ❖ Ask your teacher about helping to ID the critters found on monitoring traps!

BUGS ARE COOL, BUT NOT AS PESTS IN SCHOOL
